REMARKS

This is UNEVALUATED Information

25X1

On 22 November 1950 the Soviet Control Commission requested all Kreisbaumeister (county construction offices) of the Soviet Zone of Germany to submit exact data on all permanent and temporary bridges, including information on length, width, and load capacity. *

* Comment. It is surprising that the Soviets should have made such a request, since the SCC Transport Division was supplied with complete files on bridges by the Directorate General, Motor Traffic and Roads. The SCC is continuously informed on any changes in the status of bridges. It seems possible, however, that the Soviets distrust the correctness of the files submitted to them, and therefore request additional reports from subordinate offices of the Directorate General. 25X1
